ACVM Release Only	Y
	N

Dear Clive

#### **CLASS DETERMINATION Invigorator Plant Food**

The Agricultural Compounds and Veterinary Medicines Group has completed a class determination for the above named product.

Based on the information submitted, this product has been determined not to be an agricultural compound for the following reason(s):

Invigorator Plant Food is a fertiliser used to provide nutrients to plants in an agricultural situation. All label claims are consistent with those of a fertiliser, and therefore the product is exempt from registration under the ACVM Act provided that the conditions in Schedule 5 are met.

This class determination becomes invalid if:

1. This product is changed in any way.
2. This product is advertised using information different from that assessed in the process of this class determination.
3. Three years has elapsed since the date of this class determination.
4. You do not comply with the conditions stated in the ACVM Regulations 2001

This Class Determination letter must be presented to MAF Quarantine Services in order to release the above named product, if it is being imported.

Although the ACVM Group does not have regulatory interest in the product, you may still be required to comply with the Hazardous Substances and New Organisms Act 1996 and the Biosecurity Act 1993. Please refer to ERMA NZ and the MAF Biosecurity Division respectively at [www.ermanz.govt.nz](http://www.ermanz.govt.nz) or [www.maf.govt.nz/biosecurity/](http://www.maf.govt.nz/biosecurity/) for further information.

Yours sincerely

A handwritten signature in blue ink, appearing to read "Claire Truscott", is written over the "Yours sincerely" line.
